# Invite you to the OpenSPARC™

## FREE INTRODUCTORY WORKSHOP

in Brussels, Belgium at  
Sun Microsystems' Zaventem Office  
23rd and 24th April 2009

This OpenSPARC Workshop will be given by designers, developers, and programmers who worked on the creation of the UltraSPARC T1 and T2 microprocessors. The workshop is intended to assist lecturers as they teach the next generation of engineers, developers and designers.

Speakers will include: Shrenik Mehta, Senior Director, Microelectronics Group, and Darryl Gove, Performance Analyst, Author "Solaris Application Programming", from Sun as well as representatives from Synopsys and Xilinx. The workshop will cover:

- Chip Multi-Threading (CMT) Era
- OpenSPARC Program
- SPARC Architecture Generations
- OpenSPARC T1 Overview
- OpenSPARC T2 Overview
- What's Available for OpenSPARC
- OpenSPARC FPGA Implementation
- OpenSPARC Simulators
- Hypervisor and Virtualization
- Developing Applications for CMT Processors
- Operating Systems for OpenSPARC
- OpenSPARC Community Participation
- Synthesizing OpenSPARC Design in 90nm Technology Library

This is a unique opportunity to learn about OpenSPARC architecture for implementation in your own SoCs. For further details and registration, please visit the EUROPRACTICE Software Service website at:
