The design tools in the EUROPRACTICE Software Service portfolio are for **strictly non-commercial** research and/or teaching purposes under the terms and conditions of the End User Agreements. Usage is limited to staff and students of the End User and only at the premises of the End User. End Users will also be required to complete additional documentation at the request of some EUROPRACTICE vendors.

With a few exceptions, EUROPRACTICE orders are mostly processed on a once per month bulk licence order to each vendor and the deadline for receipt of all order paperwork (paper originals of legal agreements included) is the 25th day of each month. All EUROPRACTICE Financial Transactions are made in EUROS. New members (and in certain cases existing members) will be expected to pay for design tool orders in advance of receiving licences.

The EUROPRACTICE Software Service is managed by the Microelectronics Support Centre at [STFC Rutherford Appleton Laboratory](#) in the UK. Please e-mail us MicroelectronicsCentre@stfc.ac.uk with any questions and for all EUROPRACTICE design tools support enquiries in future
