LICENSE SERVER INFORMATION FOR SOFTWARE PURCHASES

Server Identification (Note 2)										Server Machine Type & Operating System	

License bundle name	Previous number of seats on server	Number of seats being purchased	Total number of seats on server
OVPsim			
M*SIM			

Imperas does not support generation of licenses for virtual machine MAC addresses. The server identification must be the MAC address of the physical network hardware and not that of a virtual machine environment

Please duplicate this page and use a separate copy for each different license server

Note 2: Server Identification

PC Windows: MAC Address from the Ethernet card:
1. from MSDOS window, type: ipconfig /all
2. find the line "Physical address"
The required ID is 12 Hex characters long (ignore any hyphens)

PC Linux: /sbin/ifconfig -a eth0 | grep HWaddr
The required ID is 12 Hex characters long (ignore any colons)
