License Fees	Qty License/Rehost	Unit cost EURO License/Rehost	Total Cost EURO License/Rehost
Intel CoFluent Studio for System Architecting - Pack of 10 licenses		0	
Rehost		0	
Mandatory transaction charge for new licenses and rehosts	1	50 or 0 (Note 2)	50 or 0
A: Total License Fees			

Maintenance Fees	Already under Maintenance due to existing licenses (yes or no) (Note 1)	Unit Cost EURO Maintenance fee	Total Cost EURO Maintenance fee
Intel CoFluent Studio for System Architecting Maintenance		250	
B: Total Maintenance Fees			

Right to use, upgrades and technical support are provided under maintenance, compulsory for each year of use of a package, including the first. Maintenance fees are irrespective of number of licenses being purchased, **(Note 1)** Commitment of Maintenance fees with first license order for any new bundle is mandatory. **(Note 2)** Single charge irrespective of number of licenses or rehosts applied for. The transaction fee charge only needs to be paid if you are NOT paying maintenance with this order

Software Ordering information and Maintenance Fee structure clarified at: http://www.euopractice.stfc.ac.uk/euopractice/software/software_ordering.html

For advice on who an Institution's EUOPRACTICE Representative is, on an Institution's current Maintenance holdings, and for all other EUOPRACTICE support enquiries, please e-mail MicroelectronicsCentre@stfc.ac.uk

LICENSE SERVER INFORMATION FOR SOFTWARE PURCHASES

Server Identification (Note 2)												Server Machine Type & Operating System	
												Server Name	

License bundle name	Previous number of seats on server	Number of seats being purchased	Total number of seats on server
Intel CoFluent Studio for System Architecting (COFLU)			

Intel does not support generation of licenses for virtual machine MAC addresses. The server identification must be the MAC address of the physical network hardware and not that of a virtual machine environment

Please duplicate this page and use a separate copy for each different license server

Note 2: Server Identification

PC: MAC Address from the Ethernet card:
 1. from MSDOS window, type: ipconfig /all
 2. find the line "Physical address"
 The required ID is 12 Hex characters long (ignore any hyphens)

PC Linux: /sbin/ifconfig -a eth0 | grep HWaddr
 The required ID is 12 Hex characters long (ignore any colons)

Linux is only supported as a licensing platform. The tools are not available under Linux.
